Install

STEP 1

Remove the existing doorbell button. Make sure the existing doorbell wires do not slip into the wall.

STEP 2

Feed the existing doorbell wires through the hole in the center of the mounting bracket. Secure the bracket to the wall with the provide walls crews going through the top and bottom holes in the bracket. Make sure the bracket is flush on the wall.

STEP 3

Loosen the terminal screws on the mounting bracket and insert the wires beneath the screws. Tighten the screws down on the wires making sure the screws are tighten approximately the same amount so the screwheads are flush.

STEP 4

Attach the doorbell camera to the mounting bracket. Slide the top of the camera down on to the mounting bracket and push the front of the doorbell camera toward the wall. Gently tighten the screw on the bottom of the camera. **Caution:** It is a plastic screw so it will break easily. The camera's LED should light up.

STEP 5

Using the alarm.com app connect the doorbell camera to your account.
