

V620PT CAMERA

Wireless Interior Pan/Tilt Camera

Need help? Give us a call.
1-877-826-5443

Required Items

- Camera and power adapter (included)
- Broadband (Cable, DSL, or Fiber Optic) Internet connection with router
- Personal computer or web-enabled tablet
- Login/password for the your Alarm.com account
- A router with Wi-Fi Protected Setup (WPS) button or an Ethernet cable

If the router does not have a WPS button, and the camera will be connected to a wireless network, you will need the case-sensitive SSID (wireless network name) and the network WEP or WPA key (if encryption is enabled at the router)

Enrolling the Camera

1. Go to www.linkinteractive.com, click on Alarm.com login in upper-right-hand corner, log into your account, click on Video tab, and then "add camera."
2. Follow the on-screen instructions to add the camera to the Alarm.com account.

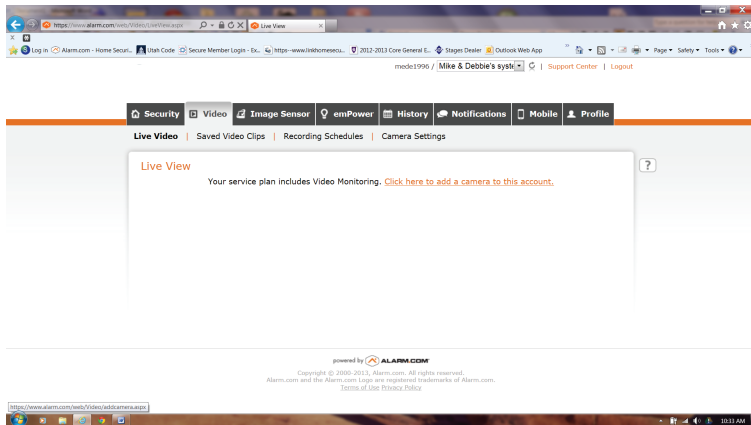

**You can configure the camera's wireless settings when setup is complete. Click on the "Configure wireless network settings for this camera" link and follow the on-screen instructions.*

After clicking the Video tab, **click** on the link to add your camera.

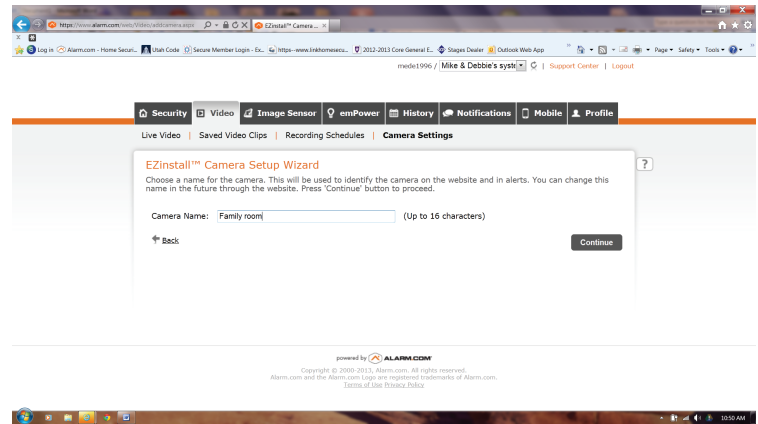

Hint: Make sure you follow the sequence of instructions listed below.

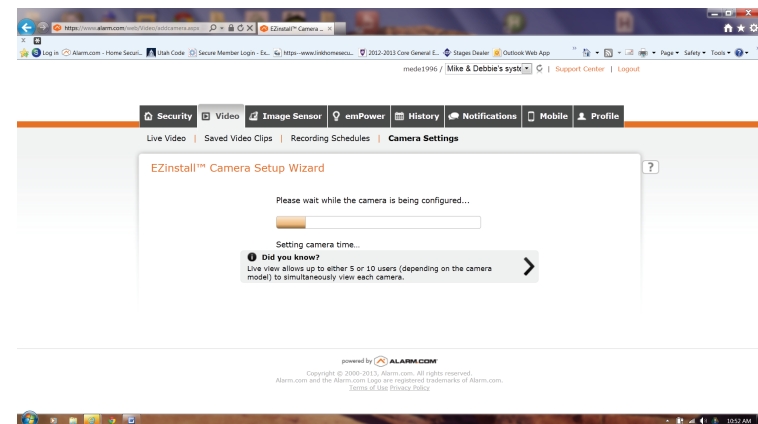

Once you see your 2GIG-HD100, **click** "Continue." (NOTE: Customer will only see one camera if adding a camera for the first time. Ignore the first two cameras shown on the screen.)

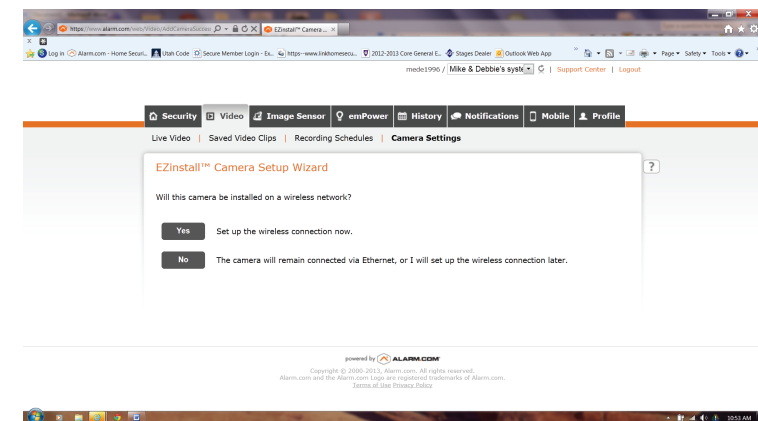

If you would like to give your camera a custom name, type over 2GIG-HD100 in the box with the name of your choice, and **click** "Continue."

This step can take a few minutes. Please do not leave the page at this time.

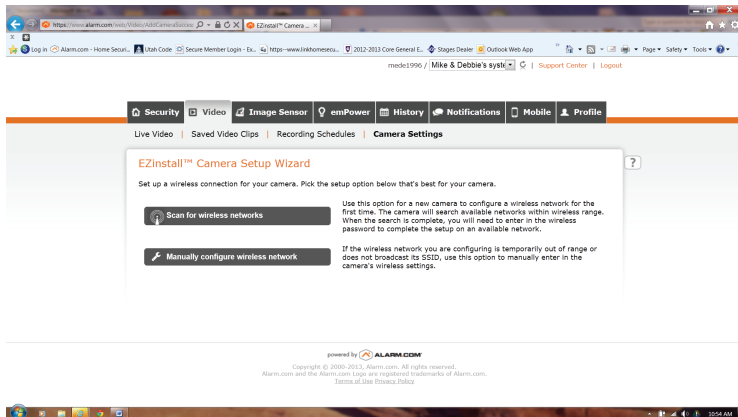

Once configured, this screen appears. **Click** "Yes."

Click "Scan for wireless networks."

Click on the box next to your wireless network, **enter** your network password, **click** the box to "Apply these settings to all wireless cameras" on this account, and **click** "Continue."

This screen should now appear. Follow instructions and click. Above steps completed. You will see a progress screen for a brief moment.

You have successfully added your camera! Be sure to "Edit Recording Schedules" to set up how you want video clips to be recorded for motion and/or alarm events. Simply **click** on the "Edit Recording Settings" button to customize your settings.
